

CORPORATE & INVESTMENT BANK 2019 MARKETS SUMMER ANALYST PROGRAM

If you want to learn about how global financial markets move while working in a collaborative, supportive team structure, then sales, trading and research is right for you. Our teams research and identify opportunities for our clients, help them with complex financial transactions – and we do it all in a fast-paced, dynamic environment that's never dull. If you like working quickly, developing relationships or diving deep into analysis, we have a role for you.

You'll build the skills and knowledge to take your career in any direction imaginable. In our e-trading group, you'll work with markets, quantitative research and technology to develop sophisticated mathematical models and methodologies. In research, you'll analyze data and insights to drive innovation for our clients.

Working here means joining a collaborative, supportive team. We want your diverse perspective to help us innovate the next wave of products and solutions for our clients. You'll have what you need to succeed – from training and mentorship from senior leaders to projects that engage all your skills.

What to expect

This nine-week program starts with virtual training, followed by five days of classroom instruction on markets, credit analysis, economics, financial metrics and Excel. Through hands-on experience and ongoing education, you'll participate in trading simulations and learn more about global market strategies and asset classes - equities, credit, foreign exchange, commodities and emerging markets. Top performers may receive a full-time job (for juniors) or internship (for sophomores) offer at the end of the summer.

You'll make an impact by:

- Helping propose trade ideas
- Managing risk as part of a team
- Conducting research on various sectors
- Sharpening your technical skills
- Building your professional network with mentors, senior executives and others

About you

We're looking for individuals with the vision and insights to advise our teams and clients around the world. Key skills include:

- Exceptional quantitative, analytical and communication skills
- Genuine interest in financial markets and economic data and trends
- Knowledge of Excel, Powerpoint and Word
- Excellent leadership and collaborative skills
- Fluency in English
- Attend college/university in the U.S.
- Expected graduation date of September 2019 – July 2020
- Minimum required cumulative GPA of 3.2 on a 4.0 scale

Join us

At JPMorgan Chase, we're creating positive change for the diverse clients, customers and communities we serve. We do this by championing your innovative ideas through a supportive and inclusive culture that helps you every step of the way as you build your career. If you're passionate, curious and ready to make an impact, we're looking for you.

What's next?

We will review summer internship applications as they are received and extend offers on a rolling basis. We strongly encourage that you apply early since programs will close as positions are filled. A cover letter and resume are required. Please ensure both are attached to your profile before submitting your application.
