

## Hear what ex-scholars from different backgrounds have to say...

**Victor Huang**

Business Analyst, NTU  
Information Management

The Scholar program allowed me to **discover my potential and passion in serving industry-leading companies through my analytical skills**. I also met some of my lifelong friends and we are both working together in the firm now.

**Melissa Shih**

Business Analyst, NTU  
International Business

Through in-depth workshops and real-life case coaching, I was able to **exercise problem solving under professional guidance**. I also got a chance to closely observe the **diverse and vibrant culture at McKinsey, which encouraged me to join the firm**.

**Jack Shen**

Business Analyst,  
NTHU Computer Science

As an engineering student, **I did not realize how exciting and impactful working at McKinsey could be until I joined the Scholar Program**. I was introduced to a whole new world where **exceptional people from different background work together to solve meaningful problems** and support each other to grow.

# How do I apply and prepare?

The assessment process consists of three stages

Apply online

Problem Solving Game

Selection Process

Application deadline:  
**May 15, 2022**

Application requires your latest English resume and transcript. It should include academic grades (GPA) and achievements, awards and scholarships, public examination results (e.g., TOEFL, TOEIC), and leadership experiences.

Application link:  
[www.mckinsey.com/2022TaipeiScholar](https://www.mckinsey.com/2022TaipeiScholar)

The McKinsey Problem Solving Game is an **invite-only** online digital assessment that allows you to showcase how you approach problems, while no prior knowledge in business is necessary to complete the tasks.

Please visit

<https://www.mckinsey.com/careers/mckinsey-digital-assessment> for more information regarding the McKinsey Problem Solving Game

You will be invited to participate in our selection process, and further details will be provided after May as we are still monitoring the current COVID-19 situation.

## The McKinsey Scholar Program aims to serve as an orientation to a career at McKinsey

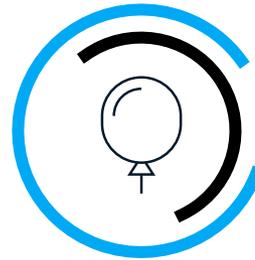

McKinsey Scholar Program is an initiative to nurture leaders of next generation. It is designed to help participants **explore career options**, through the following activities held on weekends between Jun – July 2022:

Training workshops

Case competition

Social events

# What will I gain from the program?

## Valuable skillsets

You will learn the **McKinsey approach** and enhance your capabilities in problem solving, critical thinking, analytics, presentation and leadership

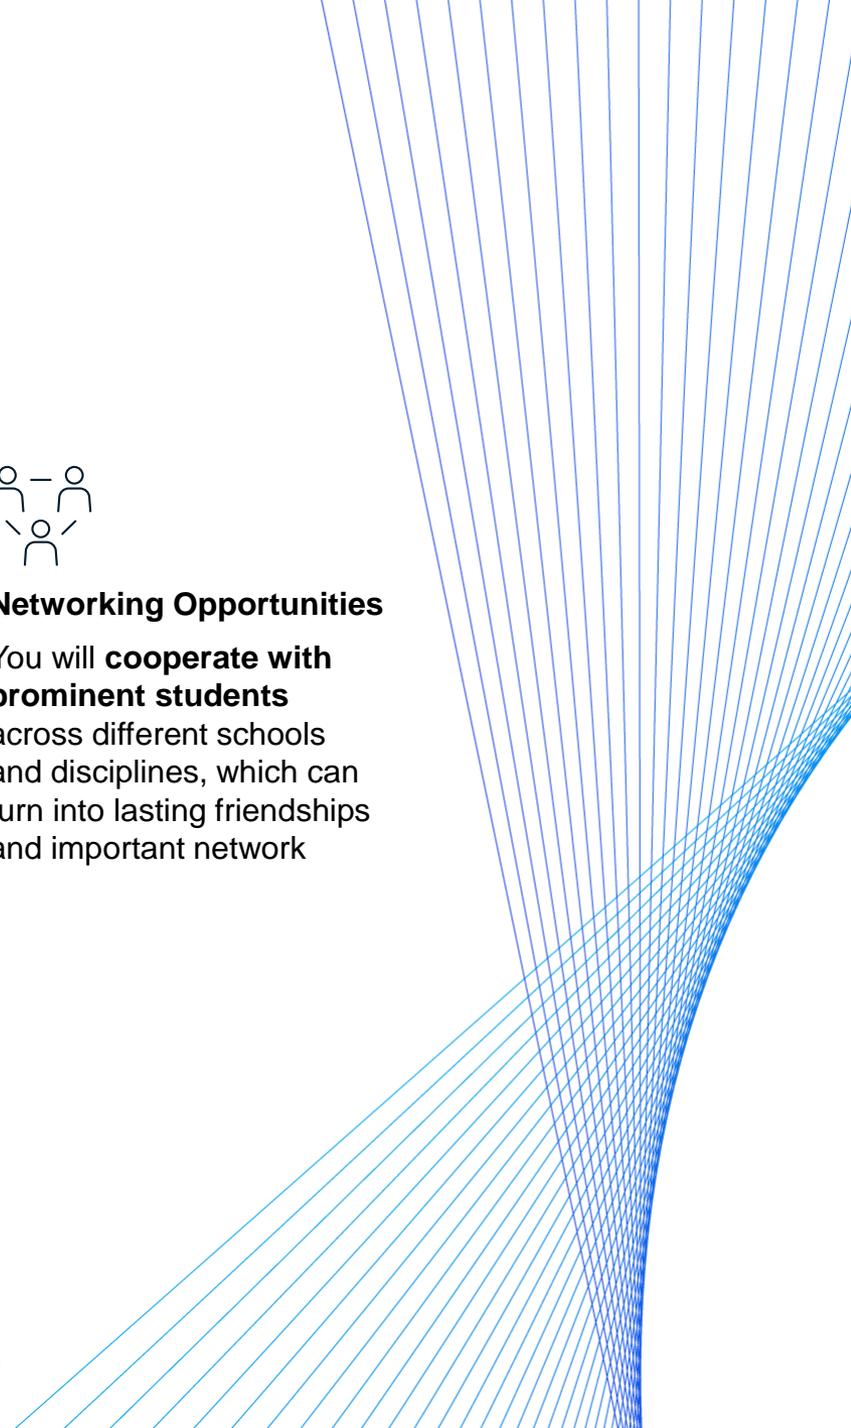

## Professional Mentors

You will be **directly coached by senior consultants** and can learn more about the industry, the firm and the exiting career options ahead

## Networking Opportunities

You will **cooperate with prominent students** across different schools and disciplines, which can turn into lasting friendships and important network

## Who are eligible for the program?

We welcome talents **regardless of degree or background**, and our previous scholars came from very diverse backgrounds. There have been students professionalized in engineering, business, medicine and even astronautics!

If you are **an undergrad or graduate student graduating in 2023 or 2024** with passion or curiosity in consultancy, please don't hesitate to join us! (For Taiwanese students currently studying overseas, please consider the time zone differences of the program as we will not be able to match all time zones.)
