About the Role

The **Operations Associate** role offers a distinct opportunity for professional growth and the chance to assume diverse responsibilities. This position involves various responsibilities, such as project management, market research, marketing, and quality management, and directly reports to our Head of Business and Operations and QA Manager. We are looking for a young, versatile talent who is eager to learn and tackle new challenges. Joining Vysioneer means you will be a key early team member and make a significant impact on the products and the company.

Primary Responsibilities

- **Maintain Quality Management System** – develop documentation in adherence to QMS SOPs and standards; organize quality related activities
- **Manage Projects** – monitor the progress of the project and coordinate the team to meet established timelines
- **Establish Product Development Process** – work with ML/SW product team to build process and develop documentation
- **Perform Market Research** – convert unstructured data/information into insights for business development and sales/marketing
- **Support Ad Hoc Tasks** - be able to timely assist with unplanned tasks as they arise.

Requirements

- 0-2 years of experience in any field
- Detail-oriented with the ability to look at the bigger picture
- Adaptable and prepared to tackle new challenges as the company expands
- Possesses a strong sense of responsibility, teamwork, and a can-do attitude
- Motivated, proactive, and capable of learning within a very collaborative and fast-paced environment
- Demonstrates meticulousness in documenting work
- Works efficiently, with a keen ability to comprehend regulatory and guidance documentation

Application

Please submit your resume to Vicki Lin (vicki.lin@vysioneer.com).
